EDUCATION

Chitkara University

B.E. Computer Science Engineering - AI (CSE-AI)

• CGPA: 8.66

Rajpura, Punjab

Expected May 2028

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Django, Flask, FastAPI, REST APIs

Machine Learning & Data Science: NumPy, Pandas, scikit-learn, XGBoost, LightGBM, TensorFlow

Computer Vision: OpenCV, scikit-image, Pillow

Natural Language Processing & RAG: Hugging Face Transformers, LangChain, FAISS, Tesseract OCR

Data Visualization: Matplotlib, Seaborn, Plotly

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, Render, Postman, VS Code

Core Concepts: Data Structures & Algorithms, DBMS, OOP, Operating Systems

PROJECTS

VectorMind — Enterprise RAG Search Platform

FastAPI, LangChain, FAISS, Llama 3, React, PostgreSQL, Docker

GitHub | Live Demo

- Developed a production-grade Retrieval-Augmented Generation (RAG) platform enabling semantic search and citation-backed question answering across **10,000+** enterprise document chunks.
- Built an end-to-end document intelligence pipeline using LangChain, FAISS, Sentence Transformers, and FastAPI, achieving **92% Top-5 retrieval accuracy** with low-latency inference.
- Implemented JWT authentication, role-based access, multi-document search, persistent chat history, and Dockerized deployment through scalable FastAPI microservices.

SurgeIQ — AI-Powered Dynamic Surge Pricing System

Python, XGBoost, Flask, React, Scikit-learn

GitHub | Live Demo

- Collaborated in developing an AI-powered surge pricing system using XGBoost Regression on **50,000+** synthetic ride records, achieving **84.84% R²** and **0.132 MAE**.
- Designed and implemented the end-to-end machine learning pipeline, including preprocessing, feature engineering, model training, and evaluation.
- Integrated the trained model with Flask REST APIs and a React frontend for real-time fare prediction and interactive visualization.

Smart Classroom Climate Controller — AI-Enabled IoT Automation System

ESP32, Embedded C, ThingSpeak Cloud, IoT, DHT22, PIR Sensors

GitHub

- Designed and developed an intelligent IoT-enabled classroom automation system capable of dynamically regulating environmental conditions using real-time occupancy, temperature, and humidity data.
- Engineered an end-to-end sensing pipeline by integrating ESP32, PIR motion sensors, DHT22 sensors, relay modules, and ThingSpeak Cloud for autonomous appliance control and continuous environmental monitoring.
- Built a cloud-connected analytics dashboard providing real-time telemetry, occupancy insights, and energy-efficient automation, demonstrating practical IoT deployment for smart infrastructure.

EXPERIENCE

President

NAZARIYA - Filmmaking Club

Feb 2026 – Present

Chitkara University

- Founded and led a filmmaking organization, managing a team of 60+ members.
- Directed planning and execution of media projects, ensuring timely delivery.
- Coordinated teams, delegated tasks, and managed production timelines.

Media Executive

Evolve AI Club

September 2025 – Present

Chitkara University

- Produced promotional media for AI events reaching **1200+ participants**.
- Managed digital outreach, branding, and social media campaigns.

CERTIFICATIONS

Microsoft Certified: [Azure AI Fundamentals \(AI-900\)](#) • [Azure Fundamentals \(AZ-900\)](#) • [Azure Data Fundamentals \(DP-900\)](#)

ACHIEVEMENTS

Swiggy's Creator Club (2024) — Selected as one of only **50 students nationwide** to participate in Swiggy's flagship creator program, gaining experience in digital content strategy, audience engagement, and performance analytics.

Founder — Nazariya Filmmaking Club — Established a university-level filmmaking community to foster creativity, visual storytelling, and collaborative filmmaking through productions, workshops, and campus-wide initiatives.
